Yates FUN KIDS SEEDS

If you want to grow the biggest, most astounding pumpkin you've ever seen, try this one! Feed it heaps of fertiliser, so the greedy beast can get really huge.
Plant in Spring.

These crazy gourds grow in the weirdest dinosaur shapes you can imagine. They're all warty! They have super long necks! You can even dry then out and paint them.
Plant in Spring.

A short sunflower with super fluffy pompom flowers. This fuzzy little guy doesn't take up much space and grows well in a pot.
Plant in Spring.

These tasty alien critters are shaped just like UFOs, in funky bright colours. Look for the boy flowers with a skinny stalk and the girl flowers with a fat base
Plant in Spring.

Sprinkle like fairy dust, and grow a home flowery home for fairies to live in. Snip off old flowers to get new flowers or leave them alone and let their seeds grow even more flowers. Plant in Summer.

Grow your own popcorn! This is a special, old-fashioned type of corn, that grows cute little cobs shaped like strawberries. Grow them in a small circle or small block of rows for the best results. Plant in Spring

Get ready for explosions of red, purple, yellow, green, and even orange carrots. Make sure the soil is light and fluffy with no sticks, stones, or lumps for good straight carrots. Plant in Autumn.
